

**BÅNGBRO STRIP STEEL**

YOUR CENTER FOR STRIP STEEL AND STEEL SERVICE

# Your center for strip steel and steel services, where quality meets precision!

We offer a wide range of **cold-rolled strip steel in carbon steel, stainless steel and special steel**. Whether you need annealed, spring steel, hardened and tempered or high-strength steel, we have the materials you are looking for in various steel grades. By providing factory deliveries directly from the mill, warehousing and expertise in precision steel processing, we are your complete supplier. Do you have material in stock? We are happy to assist with contract work!

Together, we ensure you choose the right steel grade for your project. With our qualified technical advice, you can feel confident in your decision. We are more than just a supplier — we are your partner in developing projects, helping you take your project to the next level!

We offer steel strip delivered directly from the producer or from our steel service center in both small and large quantities. We pride ourselves on solid material expertise, fast deliveries, customized quantities and excellent service. At Bångbro Strip Steel AB, our large warehouse and efficient machinery enable fast and cost-effective deliveries, whether you need a few kilos or many tons. Our close collaborations with leading steel producers in Europe ensure that we can meet your exact needs.

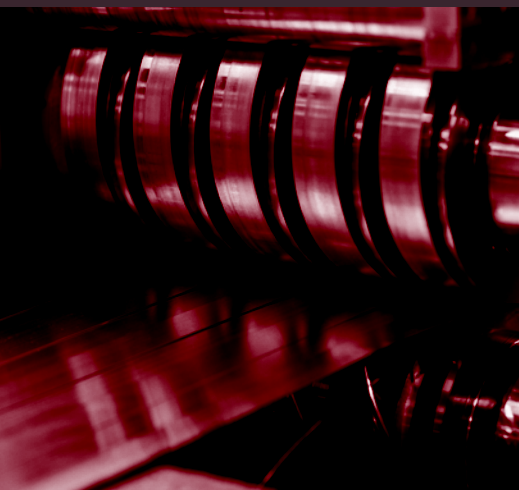

## Discover our wide range of strip steel and sheet metal

By utilizing our expertise, you improve your competitiveness with an optimized final product in terms of function, cost and performance. Your process will become more efficient with the right selection of steel grades. In addition to standardized materials, we also have special grades with unique properties such as RAWAEL and PT-Strip.

### Steel types we offer:

- Carbon steel
- Hardened & Tempered steel
- Micro alloyed steel
- Stainless steel
- Boron alloyed steel
- Special steel

Dimensional range: **Thickness:** 0.025–5.00 mm **Width:** 2.00–700 mm  
(Depending on steel grade and process)

# Precision processing according to your specifications

We offer:

- Slitting
- Edge dressing
- Rolling
- Cutting to length

Our wide range of carbon steel, stainless steel and special steel is available with conventionally slit, round or deburred edges through our edge dressing services. We maintain tight width tolerances using laser precision measurements. The width is digitally logged and documented through the entire coil. Process capability, **CP** and **CPK** values, as well as min. and max. values, are calculated for the entire coil.

## **Our calculation tool SteelCalculus®**

With our digital calculation tool SteelCalculus®, you can easily calculate values for coils and plates. The tool also provides access to strip steel-related information and explanations of common terms.

## **Sustainability**

We are committed to contributing to a more sustainable future by following ISO 26000 guidelines and Agenda 2030. Our work supports the UN's 17 global goals for sustainable development.

We place high demands on our suppliers and contractors to ensure they meet strict environmental and quality standards. We hold ourselves to the same high standards.

With our strong focus on environmental awareness and our carefully selected, recognized and skilled suppliers, you can be assured that both quality and sustainability are of the highest standard.
